Mr Baker,

Concerning: M035026

Concerning the 2015 annual report for the South Hansen Mine. The disturbed area is marked as 279 acres. Here area few question concerning the report and the fines pond.

Does this number include the fines pond to the west of the freeway?

How does one determine what portion of the fines pond is actual disturbance?

Was that area part of the unused bonded land that was applied to the disturbance which is the subject of the last cessation order?

Did the Division approve part of the fines pond bonding to be transferred to the area which is the subject of the cessation order?

Thank you
